

Features

- Inventronics patented metal case (Patent NO.: 201730183070.X)
- High Efficiency (Up to 93.5%)
- Full Power at Wide Output Current Range (Constant Power)
- 0-10V/10V PWM Dimmable
- Input surge protection: 4kV line-line, 6kV line-earth
- All-Around Protection: OVP, SCP, OTP
- Waterproof (IP67)
- SELV Output
- Suitable for Independent Use
- 5 Years Warranty

Description

The HUK-200SxxxDV series is a 200W, constant-current, programmable IP67 LED driver that operates from 90-305 Vac input with excellent power factor. It is designed in vertical type and specially created for bay lighting. The high efficiency of these drivers and compact metal case enables them to run cooler, significantly improving reliability and extending product life. To ensure trouble-free operation, protection is provided against input surge, output over voltage, short circuit, and over temperature.

Protection Functions

Parameter	Notes
Over Temperature Protection	Decreases output current, returning to normal after over temperature is removed.
Short Circuit Protection	Auto Recovery. No damage will occur when any output is short circuited. The output shall return to normal when the fault condition is removed.
Over Voltage Protection	Limits output voltage at no load and in case the normal voltage limit fails.

Dimming

● 0-10V Dimming

The recommended implementation of the dimming control is provided below.

Notes:

1. The dimmer can also be replaced by an active 0-10V voltage source signal or passive components like resistors and zener.
2. If 0-10V dimming is not used, Dim + should be open.

● 10V PWM Dimming

Notes:

1. If PWM dimming is not used, Dim + should be open.

Programming Connection Diagram

Note: The driver does not need to be powered on during the programming process.

Installations (Continued)

Caution:

1. Complete visual inspection prior to assembly to insure driver is received in proper condition.
2. Mounting accessory (hook, ring, etc.) has to be tightened completely. After mounting accessory (hook, ring, etc.) is installed an M3 set screw should be secured in the open location on the driver collar.
3. Maximum weight of combined luminaire/driver assembly should not exceed 20Kg.
